

The Sheridan County Solid Waste District was created on June 13, 1994 with the Sheridan County Commission approval of Resolution #241.

The District boundary lines include all of Sheridan County. The Sheridan County Solid Waste District does not accept normal household waste from outside the county.

The Sheridan County Solid Waste District is governed by a Board of Directors appointed by the Sheridan County Commission. There are eight (8) board members consisting of one (1) County Commissioner, one (1) member from each of the incorporated towns within the county (Plentywood, Medicine Lake, Outlook and Westby), one (1) member from the Sheridan County Board of Health and two (2) at-large members. Board members are appointed for three (3) year terms and there is no limit on the number of terms a member may serve. All regularly scheduled board meetings are open to the public.

The Sheridan County Landfill is a Class II facility and is licensed with the State of Montana Department of Environmental Quality and must abide by Montana State Statutes and the Administrative Rules of Montana pertaining to solid waste management.

**SHERIDAN COUNTY LANDFILL  
BUSINESS HOURS:**

**TUESDAY THROUGH FRIDAY**

11:00 AM – 4:00 PM

**SATURDAYS**

8:00 AM – 4:00 PM

**CLOSED SUNDAYS AND MONDAYS**

**CLOSED ON HOLIDAYS**

**PLEASE STOP AT THE ENTRANCE  
GATE UPON ARRIVAL AND CHECK-  
IN WITH LANDFILL PERSONNEL FOR  
INSTRUCTIONS.**

**“WORKING TOGETHER WILL KEEP  
OUR LANDFILL COMPLIANT WITH  
STATE REGULATIONS”**

**THANK YOU**

## LANDFILL FEES AND CHARGES

Residential households and commercial businesses are assessed landfill fees for Group II wastes based on number of units.

Household: 2 UNITS = \$83.00

Commercial Businesses: # of units varies based on the amount of waste produced and the type of business.

1 UNIT = \$41.50

\*\*\*\*\*  
Demolition Waste (Group IV Waste):  
Charged a fee of \$15.00/Yard.

### Tires

Passenger: \$2.00/Tire

Truck: \$5.00/Tire

Tractor/Heavy Equipment: \$10.00/Tire

### Contaminated Soils

\$20.00 - \$30.00/Ton + Sampling Expenses

\*\*\*\*\*  
There is currently no charge for the following waste:

Metal Waste, Compost, Concrete, Untreated Wood, Brush, Trees and Limbs.

NOTE: These wastes need to be separated and placed in appropriate areas of the landfill. Landfill personnel will direct you to the appropriate areas. For ease of unloading, please have these wastes separated in your load before arrival at the landfill.

\*\*\*\*\*  
THESE ARE THE CURRENT PRICES BEING CHARGED AT THE LANDFILL, BUT MAY BE SUBJECT TO CHANGE BY THE SOLID WASTE BOARD.

WOOD PILE

TIRES

METAL PILE

LAND FARM – CONTAMINATED SOILS

## CLASS II LANDFILLS ACCEPTABLE WASTE

The Sheridan County Landfill is licensed as a Class II facility and landfarm. The facility can accept Group II, Group III and Group IV waste and contaminated soils.

### Group II Waste:

Group II wastes include decomposable wastes and mixed solid wastes containing decomposable material, but excludes regulated hazardous wastes.

Examples (but are not limited to the following):

(A) Municipal and household solid wastes such as garbage and putrescible (spoilable) organic materials, paper, cardboard, cloth, glass, metal, plastics, street sweepings, yard and garden wastes, digested sewage treatment sludges, water treatment sludges, ashes, dead animals, offal, discarded appliances, abandoned automobiles and hospital and medical facility wastes provided that infectious wastes have been rendered non-infectious to prevent the danger of disease.

(B) Commercial and industrial solid wastes such as packaging materials, liquid or solid industrial process wastes that are chemically or biologically decomposable, contaminated soils, crop residues, manure, chemical fertilizers and emptied pesticide containers than have been triple rinsed or processed by methods approved by the Department of Environmental Quality.

### Group III Waste:

Group III wastes include wood waste and non-water soluble solids. These wastes are characterized by their general inert (not chemically reactive) nature and low potential for adverse environmental impacts.

Examples (but are not limited to the following):

(A) Inert (not chemically reactive) solid waste such as unpainted brick, dirt, rock and concrete.

(B) Clean, untreated, unglued wood materials, brush, unpainted or untreated lumber and vehicle tires.

(C) Industrial mineral wastes which are essentially inert (not chemically reactive) and non-water soluble and do not contain hazardous waste constituents.

### Group IV Waste:

Group IV wastes include construction and demolition wastes and asphalt. No regulated hazardous wastes are allowed in this classification.

### Contaminated Soils:

“Contaminated soil” means soil, rock, dirt or earth that has been made impure by contact, commingling or consolidation with organic compounds such as petroleum hydrocarbons. This does not include soils contaminated solely by inorganic metals that meet the definition of hazardous waste.
